7 Read and choose.

- a Today washing clothes is just a case of pressing a few buttons and waiting.
- b This was used to squeeze all the water out of the clothes.
- c People used something called a 'dolly' to move the clothes around.

The History of Washing Machines!

For hundreds of years, sailors washed their clothes like this: they put the dirty clothes in a bag, dropped the bag into the sea and then pulled it along the water! These days washing clothes is much easier, but it wasn't always that way.

The first washing machines were like huge buckets. 1) ..... The dolly was made of wood and had four 'fingers' at the bottom. Later models also had a wringer. 2) ..... Wringers were often dangerous, though, as many people got their hair or fingers caught in them! Thankfully, by the late 1930s, the first fully automatic machine was in use. By the 1960s, these machines were cheaper to buy and this type of washing machine sold millions.

3) ..... The washing machine is an invention that most people cannot be without!

1

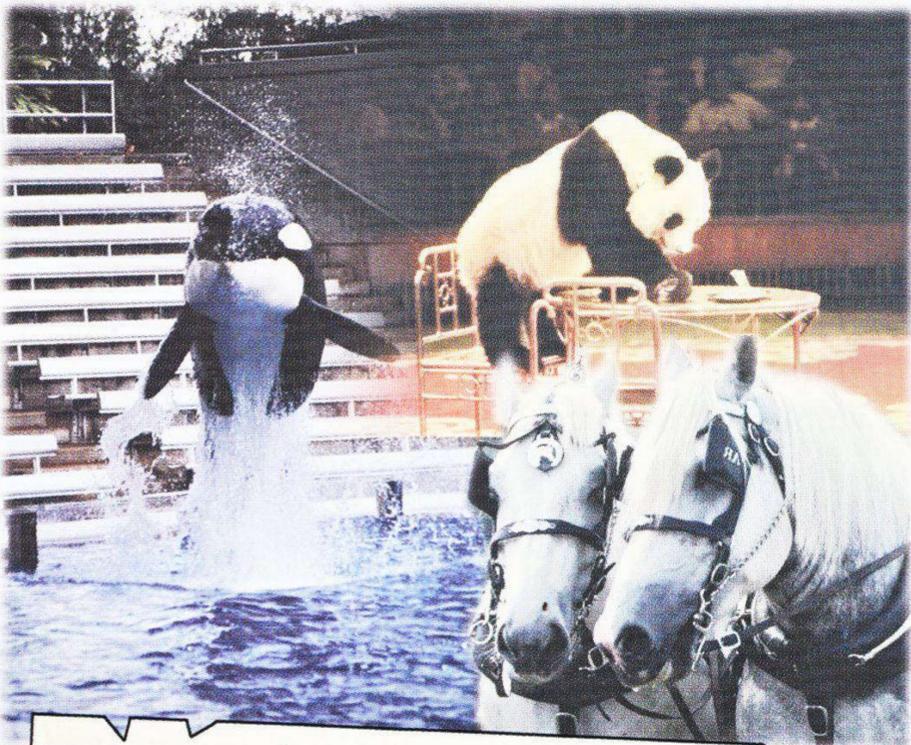

Animals deserve our protection but look what we've done to them! We've tested our chemicals on them, we've destroyed their homes, we've used them as attractions in zoos and circuses. It's not fair! They deserve better. We've got to help to protect them before they disappear for ever.

2

We can't live in big cities anymore. Chemicals from factories and cars have polluted the air we breathe. We have also covered our streets with litter and we have cut down all our trees to build more houses. Our cities need our help. Let's do something about it!
