READING

LIFE IN THE FUTURE

What will life be like in 50 years' time? We asked some experts to predict the future.

1 Communication

Some experts think that in the future smartphones will track and respond to our emotions by monitoring our facial expressions and heart rate. And it won't only be phones that do this, but other devices and machines too. So, for example, if you are in your car, and you get stressed or angry, a computer in your car will know. If the car thinks you might drive dangerously, it will adapt to make things safer.

2 Architecture

Imagine a future where today's buildings of glass and steel are replaced by buildings that are made from living materials that respond to the environment. Scientists working in the area of synthetic biology say that in a few years, it could be possible to produce fungi and bacteria that can reduce pollution levels in the air.

3 Invisibility 'cloaking'

What would you do if you were invisible? Some experts think that invisibility might become reality in the future. In recent years, scientists found that some materials made from light-bending properties can make objects appear invisible. Recent research into these 'metamaterials' showed that when objects were covered with this material, they were made to 'disappear'.

4 Food and nutrition

If you want to eat meat in the future, it may be very expensive. So, some experts say that we should use insects to replace meat. Insects are a valuable source of protein and are already eaten in many parts of the world, but if scientists are correct, they will become more common in many countries. The Dutch government recently invested one million Euros into research into insect farming. If science continues to advance in this area, then we might find beetle burgers on the menu very soon!

11 Read the text. Circle the correct options.

- Cars will have computers that can track ...
a our emotions c our way back home
b our appearance d our mistakes
- ..., some modern buildings will be made from living materials.
a In the past c In a few year's time
b Next year d At present
- Some bacteria ... to make the air cleaner.
a can't c could
b might be able d won't be able
- There are some materials that can make ... appear invisible.
a people c colours
b animals d things
- Insects are healthy for people because they have got ... protein.
a too much c a little
b a lot of d enough

10

12 Read the text again. Are the sentences true or false?

- In the future, smartphones will be able to track our emotions. _____
- Living materials may be able to make buildings more attractive. _____
- 'Metamaterials' can actually make objects invisible. _____
- Meat will be expensive in the future, so insects would be a cheap substitute. _____
- The government in the Netherlands is encouraging people to eat insects. _____

10

13 Find words in the text that mean the following.

- to follow a person or animal

- to do something as a reaction

- artificial, often copying a natural product

- living organisms that get their food from decaying material or other living things

- to provide a substitute

5

WRITING

- 14** Useful language. Complete the sentences with the words in the box. You do not need all the words.

addition believe consider do don't
point thought tried

- 1 Have you _____ joining a group?
